

NORTHFIELD MUTUAL — Continuing Care Benefit, Annual Review

Reference: NM-SYNTH-4471-B Plan holder: A. RIVERA (synthetic)

Thank you for your continued membership. This letter concerns the annual review of your Continuing Care Benefit and does not require action unless the circumstances described in section 4 apply to your household.

1. Your plan remains active. Contributions are unchanged for the current period and no adjustment has been applied following the scheduled indexation review.
2. Coverage categories are unchanged. Reimbursement rates for mobility equipment, in-home assistance hours and consumable supplies continue at the published levels.
3. Where a member receives assistance under a coordinated care arrangement, the supporting documentation held on file must be revalidated. Members in this category are required to return the completed Form CC-12 together with a current care summary no later than 26 August 2026, after which the coordinated care supplement is suspended until revalidation is complete. Suspension is not retrospective but reinstatement cannot be backdated.
4. If the plan holder's residential address, primary carer, or attending practice has changed since the last review, notify us in writing within thirty days.
5. This letter is issued for information. No response is required except as set out in section 3.
